Sterilized

For over four decades, the STUDEX® name has signified trust and safety in ear piercing around the world. With over 30 offices worldwide, STUDEX® is recognized on six continents as the world's largest manufacturer of ear piercing studs, instruments, and after care products.

As the global ear piercing leader, STUDEX® is committed to safe ear piercing around the world. We adhere to rigorous health and safety standards for our products and employees. As a result, all STUDEX® sterilized ear piercing studs meet or exceed US FDA (Food & Drug Administration) regulations and E.C. (European Communities) standards.

Hypoallergenic

STUDEX® ear piercing systems and hypoallergenic earrings are manufactured at our state of the art facility located in Los Angeles, CA U.S.A. STUDEX® ear piercing studs and hypoallergenic earrings are created using U.S. made surgical stainless steel, karat gold or titanium raw materials. Our engineers and designers work together utilizing the latest in manufacturing technology to offer the very latest in fashion with the highest quality to consumers.

Once completed, every earring and instrument passes through a stringent quality check process to deliver the safest, most beautiful ear piercing products available.

advantages of system 75

Sure grip

The system 75 instrument is designed to fit comfortably in the hand for accurate piercing.

Visible stud

The stud is always visible—inside the sealed packaging and when loaded in the instrument—for ease of identification.

Visible point

The point of the stud is clearly visible in the cartridge for pin point accuracy when piercing.

Perfect alignment every time

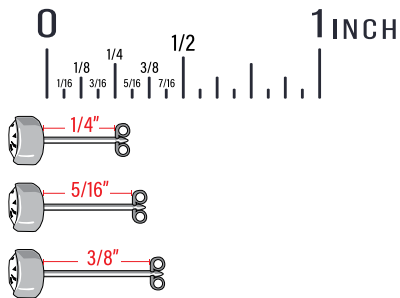

One piece cartridge gives smooth operation and ensures proper alignment of the stud with clasp.

Ultimate hygiene

The system 75 cartridge is designed to be loaded in the instrument while still inside its sterile package providing touch free operation.

Completely disposable

The System 75 cartridge is completely disposable and cannot be reused.

Hand pressure

The patented design provides a gentle action for a quick, painless piercing. The ear is pierced and the clasp installed automatically making it virtually foolproof.

Enhanced healing

Automatic positioning of the clasp ensures that proper space is left at the front and back of the ear to enhance the healing process.

Simultaneous piercing

System 75 provides two instruments, for simultaneous piercing. This is especially important when piercing young children's ears.

Piercing Studs/Post Studs

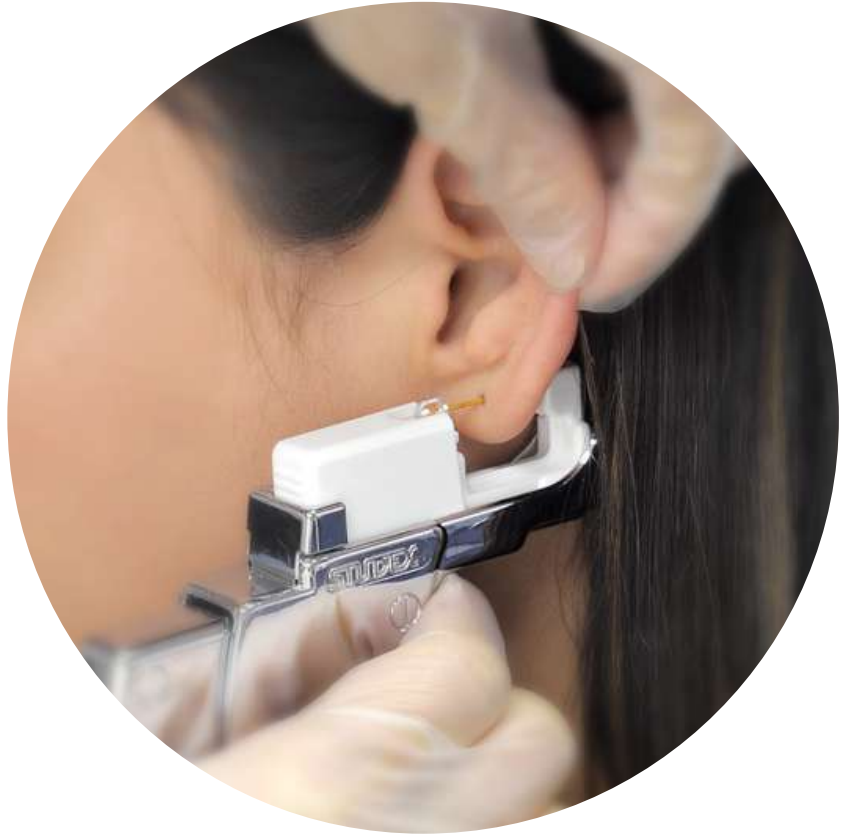

System 75 ear piercing studs are designed to be worn as post studs after the piercing period.

Single cartridge design

Each sterile cartridge contains one stud and clasp, for simple, one step loading. Single studs can be used without compromising the sterility of the second earring, allowing single application.

Made in the U.S.A.

Your assurance of the finest quality.

Everything you need to begin a professional ear piercing program today!

Why should you start a STUDEX Professional Ear Piercing program?

Because a STUDEX Ear Piercing program is a safe and simple program with margins over 75%. More importantly, it has proven to be a tremendously successful business builder. A STUDEX Ear Piercing program will increase foot traffic, new clients and increase the sales of all merchandise and services. Our team of professionals is ready to assist you!
